

IN THE CLAIMS:

Please amend the claims as follows. This listing of the claims will replace all prior versions, and listings, of claims in the application.

1 – 10 (Canceled)

11. (Currently Amended) A storage compartment for a refrigeration device, comprising:

a frame including at least two elongated arms located at a fixed distance from one another forming an intermediate space therebetween, said arms each having one end connected to a common anchoring portion mounted to an inner side of a door of the refrigeration device; and

a holder for refrigerated products configured to rest on said arms, said holder engaging in a locating manner into said intermediate space.

12. (Currently Amended) The storage compartment according to claim 11, ~~including wherein~~ said two arms are constructed ~~contiguous~~ contiguously and in one piece.

13. (Currently Amended) The storage compartment according to claim 11, ~~including wherein~~ said frame ~~surrounding~~ surrounds said intermediate space.

14. (Currently Amended) The storage compartment according to claim 11, ~~including wherein~~ said two arms each ~~have one end connected to a common anchoring portion and~~ have one free end.

15. (Currently Amended) The storage compartment according to claim 11, ~~including wherein~~ said refrigerated ~~goods~~ products holder is formed as a container having an

interior which extends below said arms when said refrigerated-~~goods~~ products holder rests on said arms.

16. (Currently Amended) The storage compartment according to claim 15, ~~including~~ wherein said container ~~having~~ has a cover.

17. (Currently Amended) The storage compartment according to claim 11, ~~including~~ wherein said refrigerated-~~goods~~ products holder is formed as a supporting plate resting on said arms, said supporting plate provided on its underside with at least one projection for locating engagement into said intermediate space.

18. (Currently Amended) The storage compartment according to claim 17, ~~including~~ further comprising a container-like cover allocated to said supporting plate.

19. (Currently Amended) The storage compartment according to claim 18, ~~including~~ wherein said container-like cover can be inserted as a refrigerated-goods holder in said frame.

20. (Canceled)

21. (Currently Amended) A refrigeration device, comprising:
a body having an interior refrigerating compartment;
said compartment including at least one wall and at least two fixing spigots mounted thereon;
a storage compartment mountable on said fixing spigots;
said storage compartment including a frame having at least two elongated arms located at a fixed distance from one another forming an intermediate space

therebetween, said arms each having one end connected to a common anchoring portion configured to mount on the fixing spigots; and

a holder for refrigerated products configured to rest on said arms, said holder engaging in a locating manner into said intermediate space.

22. (Currently Amended) The refrigeration device according to claim 21, ~~including~~ wherein said two arms are constructed ~~contiguous~~ contiguously and in one piece.

23. (Currently Amended) The refrigeration device according to claim 21, ~~including~~ wherein said frame ~~surrounding~~ surrounds said intermediate space.

24. (Currently Amended) The refrigeration device according to claim 21, ~~including~~ wherein said two arms each ~~have one end connected to a common anchoring portion and~~ have one free end.

25. (Currently Amended) The refrigeration device according to claim 21, ~~including~~ wherein said refrigerated-~~goods~~ products holder is formed as a container having an interior which extends below said arms when said refrigerated-~~goods~~ products holder rests on said arms.

26. (Currently Amended) The refrigeration device according to claim 25, ~~including~~ wherein said container ~~having~~ has a cover.

27. (Currently Amended) The refrigeration device according to claim 21, ~~including~~ wherein said refrigerated-~~goods~~ products holder is formed as a supporting plate resting on said arms, said supporting plate provided on its underside with at least one projection for locating engagement into said intermediate space.

28. (Currently Amended) The refrigeration device according to claim 27, ~~including~~ further comprising a container-like cover allocated to said supporting plate.

29. (Currently Amended) The refrigeration device according to claim 28, ~~including~~ wherein said container-like cover can be inserted as a refrigerated-goods holder in said frame.

30. (Currently Amended) The refrigeration device according to claim 21, ~~including~~ wherein said compartment wall is a door and said arms mounted on an inner side of said door.
